

Machine Learning Engineer

Company: ABC Analytics Pvt Ltd

Location: Bengaluru, India

Experience Required: 3+ Years

Role Overview

We are looking for a passionate Machine Learning Engineer to design, develop, and deploy scalable ML models that drive business impact.

Required Skills

- Bachelor's/Master's in Computer Science, Data Science, or related field
- 3+ years of experience in building production ML systems
- Strong proficiency in Python and ML frameworks
- Experience with cloud platforms and containerization
- Solid understanding of statistics, algorithms, and deep learning
- Excellent problem-solving and communication skills

Responsibilities

- Design, train, and optimize machine learning models (supervised, unsupervised, deep learning)
- Build end-to-end ML pipelines using TensorFlow, PyTorch, or Scikit-learn
- Work with large datasets, perform feature engineering, and model evaluation
- Deploy models using Docker, Kubernetes, and cloud platforms (AWS/GCP/Azure)
- Monitor model performance and implement MLOps best practices
- Collaborate with data scientists and software engineers
